

LAMINECTOMY PUNCH KÜLLING.

UP 40°, DETACHABLE.

LAMINECTOMY PUNCH KÜLLING.

UP 40°, DETACHABLE.

Use and benefit

Laminectomy punches are primarily used in spinal surgery for the removal of small portions of soft tissue, cartilage and bone.

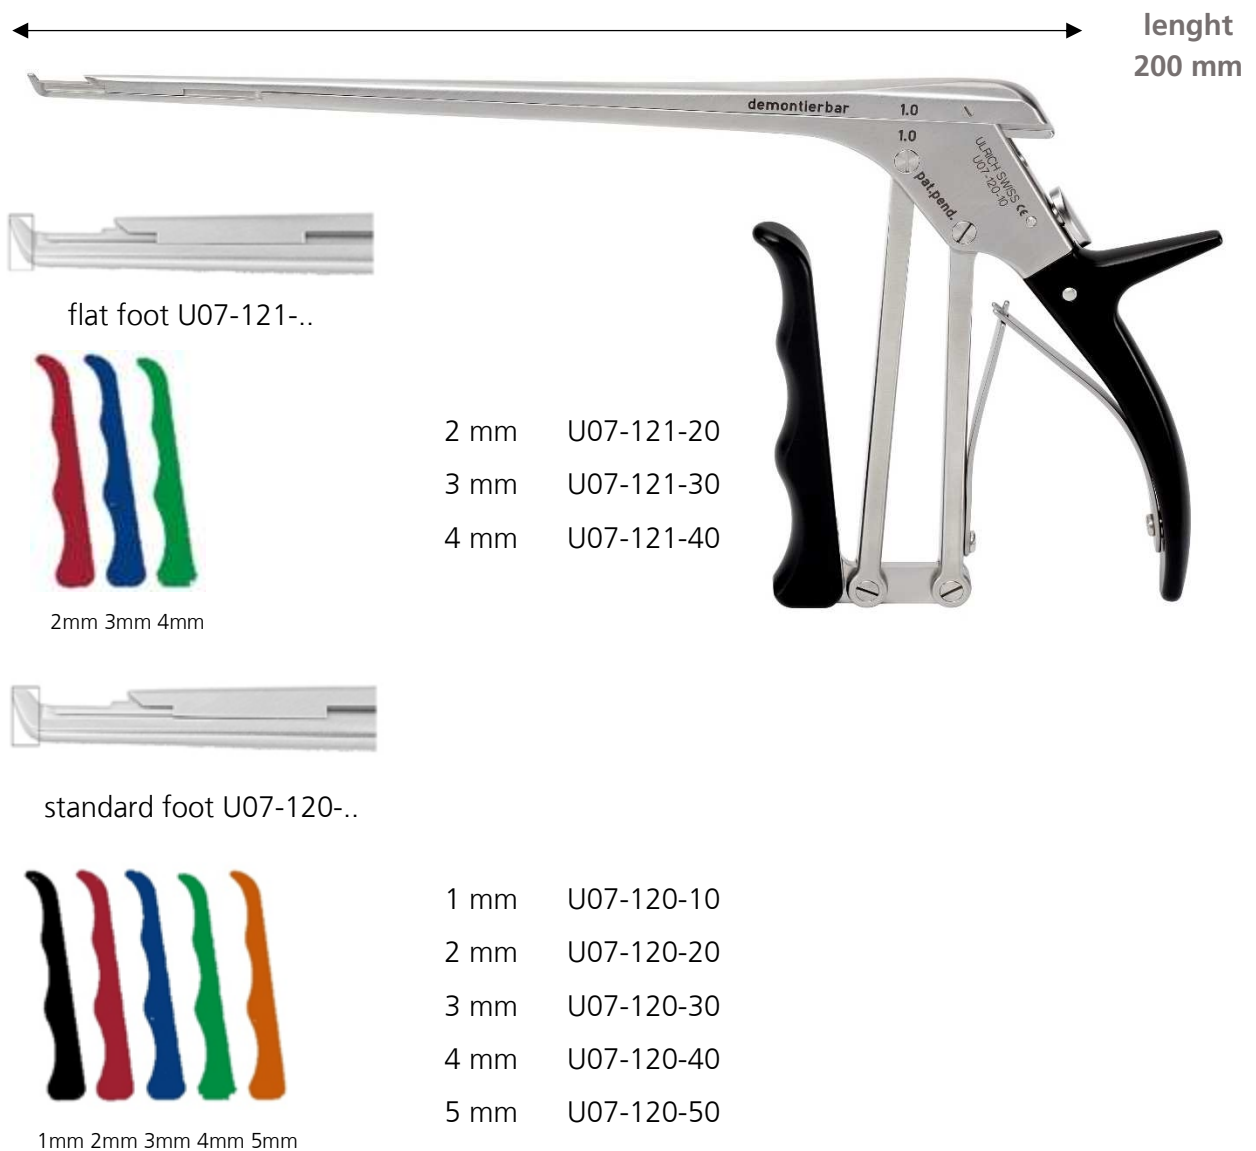

Laminectomy Punch Külling – The innovative concept and ergonomic design of the handle provides a much more precise control of the tip, as well as a smooth, effort-saving and uniform movement during the punching process.

Theoretical and empirical studies prove, what can be felt by simply comparing the Külling with a conventional Kerrison laminectomy punch. The new handle enables a smooth, uniform movement, thus enhancing tip control, as well as reducing the effort required.
